GW: Gloss White

Patina Finishes

Our hand applied patina finish is the finishing touch to your Old California lantern. Our finishing staff are really artisans who use chemicals to accelerate the aging process and create a new masterpiece on every fixture.

Our newest finish, "Mottled Bronze" has the look of raw bronze that has naturally darkened and aged over many years. Bronze Patina is our time-honored verde finish. Warm Brass and New Verde are exclusive finishes recreating the look of antique fixtures. Bronze, Old Brass, Old Copper and Rust are classic finishes that will complement many types of home hardware. Last but not least, Old Penny is our raw copper finish that naturally darkens over time to the soft brown patina of an old penny.

Interior Finishes

Polished Brass, Brushed Brass, Polished Nickel and Brushed Nickel are specifically designed for inside the bungalow. These finishes are a perfect complement to many interior and bath hardware finishes.

Powder Coat Finishes

Powder coat finishes are the most durable finish available. Applied to the brass surface as a powder and then heated to 400 degrees, our Textured Black and Gloss White finishes are traditional and durable.
