 Fixture Style Filigree Finish Glass Overall Height Slope Ceiling

Placing Your Order

Our fixture number system is like a lighting DNA. The number tells the factory staff all of the options you have selected for your new bungalow fixture.

Here is how to order your fixture.

1. First, select a design and mounting style that fits your application.

2. When available, now select the optional filigree or glass overlay. See page 62

3. Now select from one of our many finishes. See page 58.

4. Next, you are now ready to choose from our selection of art glass and mica panels. See page 60.

5. Our example fixture (bottom left) is stem mounted, so we need to determine the overall height.

See page 64 to see how we measure for a stem mounted fixture.

6. Finally, if you have a sloped ceiling, we will supply a special ceiling plate to allow the fixture to hang straight.
